

Level 1 - Assessment	Rating
Interface	
Interface is clean (no redundant properties/elements)	Meet
Scripting and Debugging	
Implementation speed	
The first test case is completed and runnable <u>on 1 target browser</u>	Meet
The second test case is completed and runnable on 1 target browser	Meet
Script quality	
No unnecessary steps and redundant steps	Meet
Variable: is defined with correct scope (global, local), no un-used variable	Meet
Initial and Final: initial test data, clean up environment	Meet
Scripting convention	
Test objectives are comprehensive and put in relevant test cases	Need to improve
Test steps are comprehensive and put in relevant test cases	Meet
Spelling and grammar	Meet
Test module, test case, HLA and variable name: must follow naming convention of TA	Meet
Automation Test design	
Tests & Data	
Script covers all of the test steps & verifications, no wrong "Pass"	Meet
Actions & Interfaces	
HLA is re-useable and not overlapped/redundant	Meet
HLA name must be self-explanatory without comment	Meet
Actions are comprehensible	Meet
Test case/test module/Interface/HLA should be well-organized	Very Good
Configuration	
Self setting-up testing environment	Meet
Export/Import repo	Meet
